

GUARDIAN AI AGENT

Access management, answered in plain language.

Guardian turns physical identity and badging into a conversation. Employees, badging offices, reception and security teams simply ask. Guardian runs the right workflow and submits the request. No forms, no ticket queues, no training.

60–80% less hands-on time on repetitive, rules-based tasks

Days→hrs turnaround for routine access & badge requests

Zero fabricated figures — analytics from real tool output
