Alert Enterprise | SailPoint

SOLUTION SHEET

One Identity. Two Worlds. Greater Security.

Unifying digital and physical identity governance for a stronger, more resilient enterprise.

The Business Challenge

Enterprises have made significant progress governing digital identities and access to applications, data and cloud infrastructure.

Yet physical access to buildings, secure areas, critical infrastructure and enterprise facilities often remains disconnected — creating security gaps, operational complexity and increased risk.

The Better Together Solution

Alert Enterprise and SailPoint are working together to bring digital and physical identity governance under a unified security framework.

Through our certified integration, SailPoint's industry-leading identity security and governance capabilities work alongside the Alert Enterprise Guardian Platform to extend identity governance into the physical world.

SailPoint

Govern Digital Identity

- Identity lifecycle management
- Access governance
- Least-privilege policies
- Compliance and audit readiness

One Identity Across Your Enterprise

Alert Enterprise

Secure Physical Identity
